### EXPERIENCE

#### Software Developer

##### Nashville Software School

-Attended Nashville Software school's full time developer bootcamp, a hands on program that teaches the skills and technologies used in both client and server side software development. Worked on many different teams designing and building full stack web applications with HTML, CSS, Javascript, C#, React and .NET frameworks.

### PERSONAL SUMMARY

Outgoing and friendly worker with a history of high standards of customer service and technical expertise. Worked as a video producer and a PC hardware technician, but now am breaking into the world of software engineering. What I love about this field is manipulating data to come up with creative solutions to complex problems and designing the images, colors, and layouts for the applications I create. I see web development as an exciting opportunity to create products to entertain, share knowledge, and combat global issues.

### SKILLS

HTML 5	Moqups
CSS 3	Figma
JavaScript	Entity Relationship
React framework	Diagrams
C#	Debugging
.NET framework	GitHub version control
Entity framework	Identity framework

### ACADEMIC HISTORY

#### Nashville Software School

##### Full Stack Developer Bootcamp

- November 2019 - May 2020
- Client-side development with HTML, CSS, Javascript, and React
