PROFILE

I'm a professional model turned software developer. Over the past few years, I have traveled around the world posing for a living, and although I truly enjoyed all that came with that, I longed to keep growing intellectually besides reading on planes! Growing up, I was fascinated by all things technology. Not only the technology itself, but the 'how' behind the screen. Hence, code. I decided to take a leap into software development, and I haven't looked back since!

FULL STACK CAPSTONE

Effortless Kitchen | Back-End Capstone

Effortless Kitchen is an application built to make booking a chef a more accessible venture for the common food lover!

- ASP.NET Core MVC Application utilizing Entity and Identity Frameworks
- Defined and maintained database using ORM tools including migrations
- Implemented full CRUD on collections

EDUCATION

Nashville Software School

Full-Stack Software Developer

TECH EXPERIENCE

SOFTWARE DEVELOPER

Nashville Software School | August 2019 - May 2020

Intensive full-stack software development bootcamp learning core fundamentals of software development and problem solving through hands-on experience and attaining the necessary developer mindset through both team-oriented and individual projects.

- Source code version control utilizing Git and Github via Command Line
- Built single-page applications using HTML, CSS, and JavaScript
- Made use of JavaScript technologies such as React and jQuery for efficiency
- Styled applications using CSS/SCSS Frameworks and Bootstrap
- Employed Firebase resources through implementing Google authentication into applications, real-time data tracking, and deploying applications
- Planned projects through writing tickets and creating ERDs and wireframes
- Used Webpack task runners to compile SCSS and modular JavaScript
- Test-driven development writing C# on the .NET Framework
- Used SQL Express, Entity and Identity Frameworks, and ORM tool resources
- Fully remote project collaboration and learning through Zoom and Slack

PROJECTS

Individual

WINEDY | Front-End Capstone

WINEDY is an application for new and old wine drinkers. Allows users to take a quiz with tailored questions that give wine recommendations based on candy preferences, so you never get a bottle wine you won't love!

- Built full CRUD application using primarily React, JSX, SCSS, and Bootstrap
- Utilized React Router Dom for dynamic navigation and manipulating state
- Used Firebase resources to implement authentication through Google, track real-time data calls, and for deployment and hosting on the web

Group

Jurassic World | Nutshell Project

Welcome to the world of Jurassic Park! This application was built for the team at the Jurassic Theme Park to track all park necessities including dinosaurs, staff, rides, vendors, equipment, and schedules.

- Adopted codebase to build on the existing functionality of the application
- Updated ERDs and wireframes with refactored data structure for new implementations and performance targets
- Responsible for assigning staff to defined schedule using create methodology

BACKGROUND EXPERIENCE

Professional Model

Willhelmine Models | July 2017 - December 2019

Wilhelmina Models is one of the most prominent talent management agencies in the world providing full-service representation and management to models, entertainers, artists, musicians, and athletes.

- Worked with designers, photographers, make-up artists, fashion coordinators, stylists, and producers to achieve creative vision and maintain fashion show and photo shoot schedules
- Maintained professional relationships on individual client basis
- Defined personal schedule for all travels locally and internationally
- Traveled to New York City, Los Angeles, Miami, London, Milan and various other cities for assignments
